

2-way switch 10A 250V~ half element with fast terminal connection system

REF. 75211-69

BASIC INFORMATION

DESCRIPTION

2-way switch 10 AX current and a voltage of 250 V. Forma part of the series Simon 82 Centralisations. It is the individual version of the product, with half element. This control mechanism is committed to the system quick terminal connection and its operation is tilting. As, it should be noted that it is possible to implement the signaling function by means of bracket neon lamp and rocker with viewer. This 2-way switch, specifically, does not include a signaling function, its installation is very versatile, as it is possible to place it both in surface-mounted and flush-mounted. To extend the service life of the control mechanisms Simon, such as this 2-way switch tilting, simply clean the product with a very soft and completely dry cloth. It is important not to use abrasive cleaning agents with the product. Simon stands out for the quality of the materials of manufacture, as well as for the design of each of its products.
