Cover for bipolar socket outlet gloss white Simon 100

REF. **10000040-130**

BASIC INFORMATION

DESCRIPTION

Cover for white and bipolar socket mechanisms. It is part of the Simon 100 series. It is an individual cover of type and with 1 element that can be installed recessed, in places with a temperature between 0 and 40ºC, although it can withstand extreme temperatures of -25 to 75ºC approximately. This cover complies with European standards and regulations UNE 20315-1-1: 2009, UNE 20315-1-2: 2009; IEC 60884-1 Ed 3.2 and it is made of thermoplastic, a material very easy to maintain, because it is sufficient to clean it with a soft cloth and slightly dampened with soapy water, without having to use abrasive cloths or cleaning products with chlorine. The Simon 100 series celebrates the centenary of the signature and consists of a traditional installation switch that can be converted to a smart one. Besides the fact that this series was created with the aim of making things simple, its user-friendliness is its main feature.

FINISH

Gloss white

COMPATIBILITY

Mechanisms Simon 100

ETIM CLASS

EC000011

MATERIAL

Plastic

PACKAGING CONTENTS

Single touch
