

Double rocker for blinds mechanism without security latching aluminium Simon 75

REF. 75029-33

BASIC INFORMATION

DESCRIPTION

With engraving of the raised, lowered and lowered we have the double Rocker for the mechanism of blinds without latching of security in aluminium of the series Simon 75. The protection of electrical and electronic systems is the raison d'être of this Simon product range, which offers a wide range of options suitable for any decorative space. Like the rest of the covers and rockers included in this series, the thermoset materials with which it has been manufactured are safe in terms of durability over time. Its great resistance to knocks and high temperatures make it the perfect rocker for space with a high influx of people such as hotels, commercial establishments or large offices buildings, another of its advantages is its easy installation both in surface-mounted and recessed in the wall, all this with the most competitive price possible.
