

Frame with intermediate piece incorporated for 1 element without claws and with centre frame ivory Simon 27

REF. 27603-32

BASIC INFORMATION

DESCRIPTION

The model Simon 27 highlights that functionality can go hand in hand the efficiency. With a classic design and an ivory finish, as it enhances even more that classicism, it is a frame that is created to fit in any space in which we want to put. Made of thermoplastic frame-holder and with a built-in metal. It is composed by an element, without capacity for more than one, and in two modules, its dimensions are 85x85mm. Its design allows the assembly in surface-mounted, as well as to incorporate any universal recessed box, and it can also be installed vertically or horizontally according to appropriate. To complete the model, we recommend the use of rockers and covers in the same ivory finish. It only requires the use of a cloth with soapy water, without abrasive cleaners. It incorporates a trim with mechanisms, covers and plates as complements levels.

FINISH

Ivory

MATERIAL

Plastic

COMPATIBILITY

Simon 75, Simon 26, Simon 27
Play and Simon 75* mechanisms
(*check compatibility)

PACKAGING CONTENTS
