

Push-button switch with bell symbol 10A 250V~ and fast terminal connection system white Simon 31

REF. 31650-30

BASIC INFORMATION

DESCRIPTION

Between the control mechanisms of the Simon 31 series products are really versatile. This is the push-button switch with bell engraving, 10A / 250V. has a quick terminal connection system and a rocker operation. Commitment to a discreet and simple white in colour finish, which gives it a perfect appearance. Simon 31 the buttons are available in a total of five finishes, so it is recommended to use the frames Simon of the same colour as the rocker selected. In this case, it would be perfect to use a frame in white finish. With measures of 64 x 65 millimetres, this is the individual version, for one element and two modules. The push-button switch is made with metal components isolated thermoplastically and free of halogens. The trim, on the other hand, it is thermostable. This type of materials increase safety in its use. The wire that supports the push-button switch Simon 31 is from 1.5 to 2.5 millimetres and the stripping of wire necessary is 11 millimetres.
