Blind cover white Simon 31

REF. **31800-30**

BASIC INFORMATION

DESCRIPTION

The blind Cover white in colour of the series Simon 31 combines two qualities that are present in all products in this range from the beginning in the manufacture of elements for all types of electrical and electronic systems: Innovative design and maximum security. There are countless advantages of this piece, whose dimensions are 64x65 mm, available in five finishes, so it is recommended to choose a frame with the same colour of the selected plate. One of them is its easy installation, both in surface-mounted and flush-mounted into the wall, which has turned it into one of the blind lids more present in all types of public and private buildings such as offices, hospitals, commercial establishments, headquarters of official organizations, hotels, bars or restaurants or educational centres. It also stands out for its great resistance, a characteristic that it adopts for the thermoplastic materials with which its structure has been manufactured.
