

IP66 Mechanism holder and manual frame for 45x45mm and 22,5x45mm K45 mechanisms

REF. KFH100/72

BASIC INFORMATION

DESCRIPTION

Simon completely renews its range of waterproof floor boxes for indoor and outdoor environments. This is a manual closure mechanism frame with a capacity for 1 K45 function of 45x45mm and another of 22.5x45mm. In combination with its tray, it will allow installation on technical flooring or pavement. The product design, combined with its manufacture from stainless steel, ensures a robust, solid, and secure installation as it withstands a water jet of 1 kg/cm² from any direction, achieving a protection rating of IP66 when the lid is closed. It also supports a maximum load of 1500 kg and has an IK08 impact resistance. It maintains an optimal cable bending radius for high-category voice and data connections. Our accessory for plug connection with a closed lid is available, allowing us to keep our connections active with an IP54 (see reference KFA1001), the possibility to level our box in case of irregular flooring (see reference KFA1003), or the ability to concatenate more than one box (see reference KFA1002).
