

Back kit for 1 element with 2 two-way switches Simon 100

REF. 10010103-039

BASIC INFORMATION

DESCRIPTION

The products of the Simon 100 series have been specially designed to facilitate installation and save considerable working time. They are therefore simple, comfortable and intuitive mechanisms that do not require any tools for their installation. The rear kit for 1 element with 2 two-way pushbutton switches Simon 100 stands out for its functionality and simplicity, as well as for the efficiency of all its components. One of its great advantages is that it has a one-click connection (1 click ®), it is very simple and fast, thus avoiding peeling the cables. In addition, it contributes enormously to the reliability and safety of the installation, ensuring correct alignment of the terminals and allowing the cables to be classified in different holes. This kit is compatible with a current up to 10 AX and a voltage up to 250 V. This product is designed to be recessed in walls and the operation of the 2 2-way switches is of the key switch type.
