Flat voice and data plate with dust cover for 1 RJ45 connector champagne Simon 82

REF. **82005-34**

BASIC INFORMATION

DESCRIPTION

What features should we require on a plate? An un-negotiable one is that it is safe, without losing an inch of innovative design that sets it apart from other similar elements developed by the competition. These two premises are very present in the flat voice and data plate with dust cover for an RJ45 connector in champagne of the Simon 82 series, it is a type of flat base plate that also includes an RJ-45 adapted module with a simple connector. This is a plate suitable for installation in a baseboard surface mounting or flush mounting in a universal box thanks to its dimensions of 55x55 mm, having been its components made of galvanized thermoplastic materials. Do not end their qualities here, as it is also available in six finishes, is easy to clean and has a very competitive price.
