

Plate for electronic mechanisms brown Simon 88

REF. 88080-32

BASIC INFORMATION

DESCRIPTION

If we want to regulate the intensity of the electronic devices in a simple way we need to have devices that include control over their operation. Thanks to this, customers can obtain the necessary environmental features in each situation, with what this means of economic efficiency in the budgets families and companies. To meet this objective, we can take the Plate for electronic mechanisms brown in colour of the Simon 88 series. Available in three finishes, this is a piece made with thermoset components of the highest quality that provide a resistance that allows it to avoid the oxidation typical of the temperatures that sometimes occur in the buildings. Its dimensions are Ø 68.3 mm and its competitive price is unrivalled from other similar products marketed by other competing companies in the market.
