

Flat voice and data plate with dust cover for 1 Systimax® RJ45 connector graphite Simon 82

REF. 82008-38

BASIC INFORMATION

DESCRIPTION

Again Simon helps us to have the safest electrical installations in our homes and businesses. Compatible with Systimax connectors, the Simon 82 series presents the flat voice and data plate with dust cover for an RJ45 connector in graphite, although it is available in six different finishes, which is why it is recommended to choose a frame with the same baseboard colour as the selected rocker. With a flat typology and dimensions of 55x55 mm, its price has made it one of the most competitive and sold in the sector, being suitable both for surface or flush mounting, a damp cloth is enough to clean it and maintain its structure as the first day, in addition, it is a plate designed to withstand all kinds of environments and temperatures, a resistance that is achieved thanks to the thermoplastic materials with which it has been manufactured.
