Single rocker for blinds mechanism with 3 positions (up, down and stop) white Simon 75

REF. **75033-30**

BASIC INFORMATION

DESCRIPTION

With three positions (up, down and stop), the individual Rocker for blind mechanism in white of the Simon 75 series makes life easier and more comfortable for people. This piece is available in the colours white, ivory, aluminium and graphite, so users can choose the frame with the same baseboard colour as the selected rocker. For its installation, it is necessary to use a universal box recessed, or in its absence a baseboard surface-mounted. In a few minutes it will be ready for use. It also stands out for its resistance to knocks and scratches, as well as to high and low temperatures, thanks to the thermoset materials with which it has been manufactured. This is a rocker chosen for its installation in buildings where blinds have a lot of use throughout the day. All the mechanisms of this series support the Simon 82 appearance.

FINISH

White

MATERIAL

Thermostable

PACKAGING CONTENTS

Single rocker and fastening bracket
