

**Voice and data angled plate without dust cover for 1
element for 1 SC duplex fibre optic connector white Simon
K45**

REF. K74/9

BASIC INFORMATION

DESCRIPTION

Plate of voice and data tilted plate without dust shutter. This plate Simon is a single element, for a connector of fiber optics SC duplex. It has a discreet finish is white in colour and belongs to the series Simon K45. Specifically is the individual version of half an element, the dimensions of the product are 45 x 45 millimetres, with a depth of 25 exact millimetres. To be able to combine the plate of voice and data Simon in vertical enclosures, such as columns and mini-columns, it is essential to use the 90 ° positioner Simon reference (K66). In this way it is possible to guide the plate into a vertical position. This plate Simon K45 is manufactured in a safe thermoplastic material, which has no free. Thanks to this type of components, Simon products support extreme temperatures, being the highest up to + 60 degrees centigrade. Are also versatile for up to its installation, as it can be installed both on the surface-mounted and flush mounted.
