

Trim frame for 1 element copper Simon 27

REF. 27964-31

BASIC INFORMATION

DESCRIPTION

This product is part of the Simon 27 series and consists of a trim frame designed for mechanisms that give energy to an element electrical equipment. It measures 90 x 90 millimetres and is made up of two modules, it is installed by means of recessed, offering the possibility of installing the frame vertically or horizontally. The frame is in a stylish colour copper that stands out for its sophistication, complying one of the features of the Simon products, it is the decorative, always without losing the function for which the product was created. It is a frame that is highly resistant to temperature and to challenges external not only thanks to the thermoplastic of which it is made, but also because this thermoplastic has been the subject to a process of galvanizing. This process consists of deposit a fine layer of metal on the layer end of a piece, increasing the force and hardness. This extends the life of the product, and it increases your security.

FINISH

Copper
