

Flat voice and data plate with dust cover for 1 Systimax® RJ45 connector white Simon 82

REF. 82008-30

BASIC INFORMATION

DESCRIPTION

In the Simon 82 series we can find this data and voice computer plate with dust cover, the plate, white colour, offers 1 Systimax ® RJ45 connector. You will find it available in different finishes so that you can find the one that best suits your home, our recommendation is that you take into account the colour of the frame and that it should match the baseboard of the plate. By embedding it or placing it on the desired surface-mounted, these two shapes you can install the piece that has dimensions of 55x55 mm. It works perfectly at temperatures between 5 and 40° C, reaching maximum temperatures of -25 to 50° C, thanks to its manufacture in thermoplastic materials. When you want to clean the piece, it is best to use a soft cloth moistened in water with soap, always avoiding any product that has chlorine in its formulation due to its high abrasive power.
