

Support with neon lamp

REF. 75802-31

BASIC INFORMATION

DESCRIPTION

Within the catalog of control mechanisms of the Simon brand, it is possible to find a wide variety of products, ideal for giving functionality to any type of electrical installation. This is the support with neon lamp of the signature. It is part of the Simon 82 series Centralizations, which lawyer by the design and the versatility. This bracket allows to convert a simple mechanism in light, although it is also possible to use it as a replacement part of Simon mechanisms with pilot. It is also the individual version of a single element, the support includes a signaling function. Simon has created a great catalog of products and control mechanisms of the highest quality that, thanks to the materials used in its manufacture, ensure the security more extreme for its use in any space. This is very important, because they also have a very long service life and does not require too maintenance.
