

Frame for 4 half elements (2 elements) with centre frame for American box white Simon 27

REF. 27614-65

BASIC INFORMATION

DESCRIPTION

This frame is part of the Simon 27 Play range and is designed for mechanisms that provide energy to four half elements or to two elements. It has frame-holder and American box. It comes in a traditional finished in white colour, which makes it possible to combine with the decoration of any place where it is placed. For this reason, it is advisable to assemble the end product covers and together with white rockers of the same colour, to maintain the harmony appearance. The frame is made up of four modules in total, but not for this purpose, it is difficult to install. On the other hand, its installation is very simple and can be carried out both on the surface-mounted and recessed, and in horizontal or vertical position. Its measures are 146 x 85 millimetres and is manufactured with thermoset components and whisk metal. These materials, of high quality stretch the service life of the product, as they make it resistant to external challenges, as well as to high and low temperatures without therefore see affected its functionality.

FINISH

White
