

IP66 mechanism holder unit with safety lock and a Italian socket P40 socket with 1RJ45 category 6 UTP brass Simon K45

REF. KSE36USEC/23/71

BASIC INFORMATION

DESCRIPTION

Mechanism holder unit IP66 with safety lock and Italian-type socket outlet P40 with 1 RJ45 category 6 UTP in brass finish. This mechanism belongs to the Simon K45 series, a collection designed to enhance connectivity in all kinds of environments. This mechanism holder unit measures 130 x 130 x 55 mm and includes 2 modules. The cover features anchors to protect the connections during use from pressure and stress caused by foot traffic. This product is made of brass, although the base is made of self-extinguishing, halogen-free thermoplastic — a safe and fire-resistant material. Thanks to its design, it integrates perfectly into any type of flooring, whether raised or conventional. To install it, simply combine the mechanism holder unit with the appropriate box depending on the installation type (reference KGE170 for conventional floors and reference KGE170TF for raised floors).

REMARKS

The cover includes anchors that protect the connections during use from pressure and stress caused by foot traffic. Since the end of March 2023, Allen screws have been replaced with Torx screws to reduce the effort required for tightening, minimize the noise generated by the expansion of the insert, and prevent potential deformation of the screw head during product maintenance.
