

Flat voice and data plate with dust cover for 1 Systimax® RJ45 connector aluminium Simon 82

REF. 82008-33

BASIC INFORMATION

DESCRIPTION

Compatible with Systimax connectors, the Voice and Data Plate with dust cover for the RJ-45 format in Simon 82 aluminium is one of the most complete parts of this series, it is a type of flat base plate that includes an adapted RJ-45 module with a simple connector. It is available in six different finishes, which is why it is recommended to choose a frame with the same baseboard colour as the rocker selected. A soft, dry cloth is enough to clean it and have it like the first day, it is a plate designed to withstand a temperature range of 5 to 40° C and a maximum temperature of -25 to 50° C. This resistance is achieved thanks to the components of galvanized thermoplastic with which it has been elaborated. Its price has made it one of the most competitive in the sector, being suitable both for surface or flush mounting.
