

Flexible connector

REF. 89910530-039

BASIC INFORMATION

DESCRIPTION

What should I install a lighting system LED? The response is OK, is technology has a series of advantages that make it a very high lighting system to conventional. Some of its main features are: High lighting efficiency, the quantity (QTY.) of light emitted by vatio is more and more quality that conventional systems, energy savings of up to 80% of the consumption, so that it is amortiza expenditure in a quick, a service life of 50,000 hours, which means that its maintenance is practically Null. A constant technology in developments that, as it is suitable for all types of pockets. Within the wide variety of accessories that Simon has for the installation of three-phase rails, stands out this flexible connector for indoor lighting, finished in white colour, a piece that in combination with the three-phase rails will allow us to increase, reducing and move the light points of a comfortable way.
