

Plate for telephone sockets with RJ11 and RJ12 connectors graphite Simon 75

REF. 75062-38

BASIC INFORMATION

DESCRIPTION

Particularly suitable for telephone sockets with RJ11 and RJ12 connectors, the Simon 75 series features this plate that fits the needs of any home. It is in graphite colour, a kind of grey that will bring you that touch of sophistication I was looking for. The plate is made of thermoplastic and is suitable for surface and flush mounting. As for its installation, the ideal thing is to choose a space whose temperatures range between 5 and 40° for a better conservation. The piece is also available in packs of one unit and there are 6 different finishes to choose from, like all Simon 75 mechanisms, the plate offers appearance and functionality in equal parts. It does not include any engraving, for proper maintenance, you can use a soft and damp chamois leather. In this type of articles, cleaning is very important and it is only enough to give slight passes to prolong its service life.

FINISH

Graphite

MATERIAL

Thermostable

PACKAGING CONTENTS

Plate

SYMBOL

Without engravings

COMPATIBILITY

Simon 75 mechanisms

REMARKS

Available in 6 finishes. It is recommended to choose a frame with a base the same colour as the selected rocker.
