

Single rocker for switches with light indicator aluminium Simon 75

REF. 75011-33

BASIC INFORMATION

DESCRIPTION

Individual rocker for control mechanisms with luminous. The finish is a beautiful aluminium tone and is part of the Simon 75 series, in total, there are six finishes in which you can take the rockers and covers of the Simon 75 series. However, it is always recommended to choose the frame of the product in the same baseboard colour or that the finish of the selected rocker. This is a guarantee of perfect appearance. The rocker is a single element, and it is of individual version, it is important to note that includes a signaling function and can be both surface or flush mounted. It is made of matt aluminium fully thermostable, withstands temperatures very versatile (between -25 to + 50 degrees centigrade). The rocker of the Simon 75 series does not include engraving on its design. For optimum maintenance, it is recommended to perform the usual cleaning the product with a soft cloth with a little soap and water.
