

1-Element Frame Black Simon 270

REF. 20001910-039

BASIC INFORMATION

DESCRIPTION

One-element frame made of high-strength painted steel with great rigidity, designed for precise and secure coupling with mechanisms from the Simon 270 series. The new version includes improvements that make installation easier and enhance the aesthetic finish, such as smoother edges and a black coating to avoid metallic reflections visible between the frame and the rocker. Easy to install, it can be positioned vertically or horizontally. For proper maintenance, it should be installed in environments with an operating temperature of 5 to 40 °C and storage temperature of -25 to 50 °C. Also available in two, three and four-element versions.
