

Hinged cover for modular items in different series aluminium Simon 27 Scudo

REF. 2705092-033

BASIC INFORMATION

DESCRIPTION

This cover is made of zamak material, which is a zinc alloy with aluminium, magnesium and copper. It stands out for its hardness and high tensile strength. It is individual, folding, aluminium colour and is used with the modular articles of the Simon 27 Scudo series. It is perfect for building sites with a recessed system to achieve total integration with the ambience. It does not include engraving. Avoid the use of abrasive products that contain chlorine and are abrasive. For cleaning, it is recommended to use a soft cloth and slightly moistened in water with soap. It is an ideal collection for environments with a large influx of people, with the risk of unwanted manipulations, impacts and vandalism because it offers a compact and reinforced design. This series, Simon SCUDO, allows us to access a large number of functions because it has been designed to use the mechanisms of the Simon 27 collection.
