Master rocker blinds Simon iO gloss white Simon 100

REF. **10002081-130**

BASIC INFORMATION

DESCRIPTION

This single master switch for blinds is part of the Simon 100 collection, the first series to integrate the Simon iO system, as well as the Z-wave protocol and the power supply from the mechanism. It is based on the "internet of things" concept, where previously analogue switches become digital, allowing different devices to interconnect with each other.

Finished in glossy white and made of polymethylmethacrylate with thermoplastic base, its installation is horizontal. It also offers a greater area of interaction because it occupies half an element.

For proper maintenance and cleaning, it is recommended to use a very soft cloth and slightly moistened with soapy water, avoiding the use of corrosive products that contain chlorine or similar substances. The directive 2011/65 / UE RoHS + directive 2014/53 / UE RED + EN 50581: 2012 + EN 60669-2-5: 2016 + ETSI-300-220-2 v2 4.1 have been followed, so it is a standard vacover device to be sold throughout the CE."
