Frame for 2 elements garnet Simon 75

REF. **75620-37**

BASIC INFORMATION

DESCRIPTION

This product is part of the Simon 75 range. This is a modern frame designed for mechanisms that supplied energy to a total of 2 devices. It measures 88 x 159 millimetres and its installation is very simple, whether it is carried out in surface-mounted and recessed, the two options that presents the product. The frame is presented in a beautiful and original garnet colour, which will be perfect in any room of the home or office where it is, by endowing her with a touch of modernity, as it comes out of the classic colour white of this type of mechanisms. The materials used by Simon to manufacture its products are very good quality. In this case, the thermoplastic predominates. Consists of a special plastic to which it has given the ability to withstand high or low temperatures. Also, provides the product an additional hardness that makes it highly resistant to external challenges, such as possible knocks or scratches.

FINISH

Garnet
