

Single rocker for blinds mechanism with 3 positions (up, down and stop) graphite Simon 27 Play

REF. 2700033-038

BASIC INFORMATION

DESCRIPTION

Applying technology to the systems we use every day in homes and businesses has been a real revolution. Handling musical strings, pictures of different lights or automatic systems of blinds and windows has nothing to do with how they were used in the past. Having control over these systems in the simplest and most intuitive way is achieved through elements such as the individual rocker for bind mechanism with 3 positions (up, down and stop) in graphite finish included in the Simon 27 Play series. This rocker (45x45) has been made with thermoplastic materials that make it ideal to withstand high temperatures in all kinds of environments, being suitable for surface and flush mounting. This reference includes engraving of the raising, lowering and stopping of blinds and the embellishing rocker, although in order to complete the function, a mechanism must be acquired and replace the included rocker.
