

Rocker half element for switches graphite Simon 82 Centralisations

REF. 82010-68

BASIC INFORMATION

DESCRIPTION

Rocker for control mechanisms Simon, which has a current finished in graphite colour grey rocker. It is the individual version and half element, that is part of the series Simon 82 Centralisations. It is, specifically, the individual version and half element. Does not include signaling function or engraving on the device. The rocker Simon can be found in a total of five different finishes, so it is advisable to choose a frame that has the same finish as the baseboard of the selected rocker. In this case, the frame should be also graphite grey, it is possible to integrate the rocker in any space, maintaining a enviable appearance. It is possible to install it in two different shapes: In surface-mounted or flush mounted. The maintenance of the product is of the minimum, since all it takes is a soft cloth, slightly dampened in soapy water to clean the rockers Simon. To avoid the use of aggressive cleaning products, it is important to extend the service life of the product.
