Support with blue LED for 1click® mechanisms with light or pilot light

REF. **7700802-064**

BASIC INFORMATION

DESCRIPTION

It is a bracket with blue LED designed for mechanisms with 1 click terminal connection that incorporates an indicator light or pilot light. This article is part of the Simon 77 series, a collection that introduces the innovative click terminal connection system, which means that the cables can be connected without stripping or braiding and, therefore, the installation time is less. Also, it also does not require the use of complex tools for positioning the mechanisms. The Simon 77 collection is, therefore, a breath of fresh air for users who do not have much technical or installation knowledge. This bracket has been manufactured in compliance with the regulation and is characterized by a high resistance to extreme temperatures, the ideal, however, is to install it in environments with a temperature range between 5 and 40°C, as in this way, the article will keep it in optimum condition for longer.

COMPATIBILITY

Simon 77 mechanisms
