

Flat voice and data plate with dust cover for 1 Systimax® RJ45 connector white Simon 75

REF. 75598-60

BASIC INFORMATION

DESCRIPTION

The flat voice and data plate with dust cover for a connector in white of the Simon 75 series is compatible with Systimax connectors, it is available in three different finishes, which is why it is recommended to choose a frame with the same baseboard colour as the rocker selected, thus increasing the combinations when assembling electronic installations in homes and companies. It is a type of flat base plate that includes an adapted RJ-45 module with simple connector. The piece stands out for its great resistance to knocks or oxidation that occurs over the years thanks to the thermoplastic components with which it has been manufactured. Once again, the Simon 75 series provides an accurate response to market demands, offering a range that offers numerous functions that provide comfort and security at the best price.
