

Trim frame for 1 element ivory Simon 27

REF. 27960-31

BASIC INFORMATION

DESCRIPTION

This trim frame is part of the range of products of the Simon 27 series, has dimensions of 90 x 90 millimetres and is suitable for mechanisms that provide energy to a single electrical equipment. Its manufacturing material is based on thermoplastic, which means that the product acquired a resistance extra. This extends the service life of the product, because, thanks to this material, it has an additional hardness, which means that support best possible challenges external without being damaged. Also, the thermoplastic gives it security, because the frame, it is capable of working at optimum conditions under a very low and high temperatures. The frame is made up of two modules that is very simple installation by means of recessed and offers the possibility to do it in a horizontal or vertical position, according to the needs. The frames of the Simon 27 series are designed to protect mechanisms, cover them and also to embellish the piece, fully integrating it in a room where it is. The beautiful ivory colour of this trim frame is also contribute to create a stylish and sophisticated appearance.
