

Protective frame for 3 elements with circular central openings white Simon 32

REF. 32632-31

BASIC INFORMATION

DESCRIPTION

The care of the electrical installations in public and private buildings such as medical centres and centers, restaurants and hotels or large headquarters of offices allows us to extend the service life of the mimas, with the resulting cost savings that this implies. The Frame protector for three elements with center openings circular white of the series Simon 32 is an element with a size of 90x234 mm Simon recommends use the control unit square opening insert for the mechanisms with square rockers. Also, the baquelita components with which it has been manufactured provide a series of qualities, such as, for example, a high resistance to knocks, impacts, in addition to avoid the deterioration of the same by the consequences of high temperatures and keep it as the first day, in spite of being used by constantly.
