

Voice and data cover with dust cover for 2 gloss black RJ45 connectors Simon 100

REF. 10000006-138

BASIC INFORMATION

DESCRIPTION

Designed for an RJ-45 format connector, the Simon 100 series voice and data plate with dust cover for two connectors in quartz-effect black constitutes the perfect combination of maximum security and the most innovative design. One of the great advantages of this part is its compatibility with AMP connectors. Its design facilitates its interaction with users, as it is an intuitive, simple and comfortable protection in terms of use and installation, suitable for flush mounting. It has high resistance to IO humidity (95% RH without dew) and high and low temperatures thanks to the PMMA materials with thermoplastic sleeve with which it was manufactured. This plate is the first interface designed to be used by hand. In the Simon 100 series, the keys are always in the same position and their matrix structure is more intuitive and easier to remember.

FINISH

Gloss black

COMPATIBILITY

Mechanisms Simon 100

ETIM CLASS

EC000018

MATERIAL

Plastic
