Rocker plate with light beam orientation for courtesy light cold aluminium Simon 82 Detail

REF. **82036-93**

BASIC INFORMATION

DESCRIPTION

Tilting plate with light beam orientation for the courtesy beacon manufactured in cold aluminium colour of the Simon 82 Detail series. The best range to choose the elements when it comes to improving the functions of your home, you can find up to six finishes to choose the one that best suits you according to the needs of your home, find the product in the category ""rockers and covers"", the best thing is to choose the same colour of the frame and the baseboard of the rocker making the most of the piece and the insertion in your home. The installation of the component is suitable for surface mounting or flush mounting, choosing the best way to save time, security and improve comfort when starting it up. The measurements to be taken into account for the installation are 55x55 mm and simply put into operation after installation. The materials that make up the element are made of thermoplastic insulation to withstand temperatures at different intervals when it is in operation.
