# Angled voice and data plate with dust cover for 1 AMP® RJ45 connector white Simon 73 Loft

REF. **73085-60**

# BASIC INFORMATION

## DESCRIPTION

Plate of voice and data tilted plate with dust cover, this plate is for an RJ45 connector AMP. The plate has a simple finish is white in colour and is part of the Simon 73 Loft series. These backplanes Simon are available in a total of 3 different finishes. The recommendation is resorting to the frame in the same colour of the white plate. This is the individual version of a single element and has no signaling function. The rockers of the Simon 73 Loft series support very variable temperature, which can oscillate between a minimum and a maximum of -25 to + 50 degrees centigrade. This is due to the thermoplastic material with which it is made, the plate. This, without a doubt, which is a guarantee of security. The dimensions of this product are 55 x 55 mA AND are compatible with AMP connectors. It has a connector, a dust shutter and an RJ45 adapter module. It does not include any engraving, for its correct maintenance, you just need to clean the plate with a soft cotton moistened with soap and water.

## FINISH

White

## MATERIAL

Plastic

## PACKAGING CONTENTS

Plate

## SYMBOL

Without engravings

## COMPATIBILITY

Simon 73 Loft mechanisms

## ETIM CLASS

EC000018
