Plate for R/TV inductive sockets white Simon 82

REF. **82053-30**

BASIC INFORMATION

DESCRIPTION

Designed for R-TV formats with a perfect combination of balance, simplicity and functionality, the Simon 82 series has one of its products the Plate for inductive sockets in white. This piece includes R and TV engraving among its features in order to know at all times which device corresponds to the same. It is a perfect plate to resist the passage of time by the thermoplastic materials with which it has been manufactured. With dimensions of 55x55 mm, this is a perfect piece to install both recessed and surface-mounted, being able to choose in its six finishes, a circumstance that allows us to choose the frame with the same baseboard colour as the selected rocker. This has made it, together with its excellent value for money, one of the best-selling R-TV boards to be used in large public and private buildings.
