Plate for electronic rotary mechanisms ivory Simon 82

REF. **82054-31**

BASIC INFORMATION

DESCRIPTION

The Simon 82 series allows regulating the power of the electrical systems we need in each situation and place, a circumstance that will increase the energy efficiency and economic efficiency of our electrical systems. With universal dimensions of 55x55 mm, the Plate for the ivory rotating electronic mechanisms included in this Simon range is the most suitable piece to achieve this objective. Its installation is very simple and can be carried out in minutes, both in surface-mounted and recessed, being available in six finishes, it has been manufactured with thermoplastic materials, with an affordable price for all types of budgets, which allows it to be included in most masonry new and refurbishment projects in homes and companies. It must be cleaned with a soft damp cloth to prevent its structure from rusting. It does not need more maintenance to make it look like the first day.
