

Product Code: QFGFC50

Description: 50mm Fire Safe Cable Clips

Dimensions

Width (mm)	20
Fixing Diameter (mm)	6
Maximum Fold Height (mm)	30
Trunking Width (mm)	50
Bend 1 Height (mm)	18.5
Bend 2 Height (mm)	29
Full Side Height (mm)	47
Base Width (mm)	47

General Information

Fire Rating	120 Minutes (2 Hours)
Material Yield Temperature	1000°C+

Materials

Material: Annealed Steel

Additional Information

Fire Safe Cable Clips are non-corrosive annealed steel cable clips that have been designed to secure all surface cables directly to the wall, with the easy fold tabs keeping cable secure. When used with appropriate fixings, the Fire Safe Cable Clips can securely hold cables on a surface at 930°C (+40° - 0°) for at least 2 hours. During this testing procedure, the cable was simultaneously exposed to a flame at the aforementioned temperature and mechanical shock for 60 minutes, followed by simultaneous exposure to water spray and mechanical shock for a further 60 minutes.

Standards

BS 5839-1:2013 (Section 26.2e)
BS 8434-2:2003
BS EN 50200:2006 PH120
