

FFTK Solution B - Bitrex

Bitter test ampoules for face fit test kit

Qualitative Fit Testing (QLFT) requires the use of equipment specified in BS ISO 16975-3 and relies on a wearer's taste response to a bitter or sweet tasting test solution to determine whether or not a facepiece provides an adequate fit. If QLFT is carried out correctly then any test solution detected by the wearer can be assumed to have come from face seal leakage, indicating a poor fit

Features

- Bitrex Sensitivity Solution #2
