Fitting Instructions

- 1. Position wall fixing bracket in location, mark wall with a pencil for centre points. Remove wall fixing bracket. Drill holes into wall and insert rawl plug.
- 2. Place wall fixing bracket over drilled holes and using the screw provided attach to wall.
- 3. Place the base of the arm of the product over wall fixing bracket and tighten the grub screw, ensuring it is at the bottom of the arm base.
- 4. If it is a double arm fitting then complete 1-3 again for the second arm.
- 5. Complete fixing i.e. insert spindle roll holder between the two arms.
- 6. Cleaning and care: Just wipe dry to a polished state with a soft dry duster. Do not use any cleaning agents or chemicals.
