

Wash basin sets

Complete fixing sets.

Suitability

Suitable for:

Concrete, natural stone, solid bricks, solid blocks, hollow blocks, aircrete.

For fixing of:

Wash basins.

Description

WD-Stand Off

Fixing set designed specifically for semi-recessed wash basins. Similar to the WD kit, this stand off version is supplied with overlength studs and additional nylon nuts, to enable the washbasin to be clamped at a distance from the wall.

WD, WST

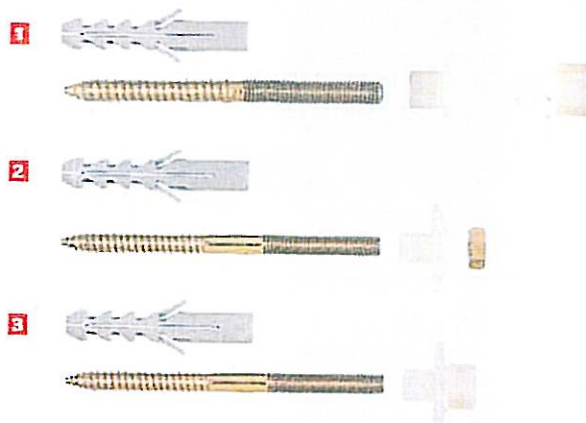

Fixing sets consisting of nylon fixings, stud screw and either flanged bushes with a hexagon nut, or one-piece nylon flanged nuts. The flanged bushes and flanged nuts are made from a high strength polyamide (nylon) and are resistant to ageing and chemicals and guarantee an elastic fixing compatible with porcelain.

- 1 WD - Stand off basin fixing
- 2 WST - Wash basin fixing
- 3 WD - Wash basin fixing

Eastbrook Road, Gloucester GL4 3DB

Technical Helpline: 01452 317890

Installation instructions:

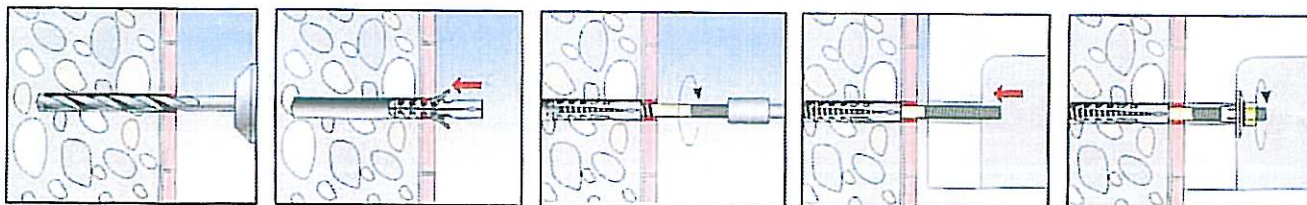

The maximum load-bearing capacity of the fixing is achieved only if the screw projects through the wallplug tip by at least 1 x screw diameter and the fixing expands in the load-bearing anchoring base with its whole anchoring depth. Tiles and plaster are considered to be non-load-bearing.
