

Installation Instruction for Glass Shelf

- 1、 Choose a flat surface and start the installation from the bottom part.
- 2、 Set up the adjustable feet: Screw the $\phi 6\text{mm} \times L 30\text{mm}$ threaded rod into the adjustable feet to make the four feet have same height
- 3、 Install the four 65mm stainless steel tubes into the four adjustable feet separately, then screw the $\phi 6\text{mm} \times L 30\text{mm}$ threaded rod into the stainless steel tubes. Put on a decorated cover and rubber gasket to the rods. Fix the glass shelf to the threaded rods. The shelf shall be installed vertically and being horizontal to the flat surface.
- 4、 To install the second glass shelf: firstly, put a rubber gasket and decorated cap into three threaded rods protrude from the first glass shelf; Secondly, install three 300mm stainless steel tubes and screw in a $\phi 6\text{mm} \times L 30\text{mm}$ threaded rod on the top of them; then put on a decorated cap and a rubber gasket and fit on another glass shelf. Regarding the other threaded rod protrude from the first glass shelf, join a rubber gasket and decorated cover to it, and screw in a 30mm stainless steel cap.
- 5、 Same installation method for the other two glass shelves. Make sure the rubber gasket must be put between the glass and decorated cover.
- 6、 After the top glass shelf is installed, screw in 30mm stainless steel head covers to finish the installation.
