PRODUCT SCHEMATIC DIAGRAM

Please make the following checks before commencing installation :

- The product supplied is the required size and adjustment is compatible with the site situation
- Check all component parts are present; see packing list and product schematic diagram for reference.
- Make sure you have all the tools required.

1

2

Check clip is in position on top and bottom profiles (A).

3

Connect part (R) onto the ends of profiles (A).

4

Secure fixed glass panels onto bottom profile (A) with ST4*30 (L) screws. Ensure gaskets (S) are in place.

(1)

Secure fixed panels onto top profile (A) with ST4*30 (L) screws. Ensure gaskets (S) are in place.

5

Place wall profiles (D) onto end of quad frame. Fit anti-water strips (J) and (I).

6

7

Lift quad with wall profiles in place onto tray and adjust until in required position.

(2)

8

Level and mark wall profile fixing holes.

9

Drill fixing holes with 6mm Ø bit .
Fix wall plugs (N).
Substitute for hollow wall fixings
if installing onto a stud wall. (N)

10

Fix in position with ST4*30 (L) screws.

11

Adjust in profiles as required.

- 12** Drill quad frame with 3.2mm bit and secure to wall profiles (D) with ST4*12 (M) screws and washer (O).

- 13** Fix rollers (F) to top of door and rollers (G) to bottom.

- 14** Attach handle (H) to glass.
Fix anti-water strip (K) to door.

- 15** Lift top rollers onto top rail of quad.
Push down on bottom roller and click into bottom rail.

16

Adjust rollers as required.

- 17 Clip screw cover profiles (C) onto washers (O).

18

Place small bead of silicone around top of profiles and fit covers (P) and (Q).

Please ensure silicone sealant is on the outside only as shown.

Cleaning and Maintenance of Shower Enclosures

Do not clean the shower enclosure with irritant detergents such as alcohol, bleach or other chemical cleaners.

Only clean with mild soapy water or a proprietary cleaner where the label advises it is suitable for the materials the enclosure is constructed from, test on a small area first.

For treating limescale we would recommend distilled vinegar in a half and half solution with water.

Following installation should you find that there is a notable noise when the glass door moves you may add a small amount of silicone lubricant onto the roller wheels and tracks, hinges or clips.

It is the responsibility of the product owner to maintain the product as recommended above. Also to check for parts which have broken or become loose to protect against failure of the enclosure.
