

## 56.1083 INSTALLATION

### INSTALLATION GUIDE:

1. Position the mirror at the hanging point and mark the drilling holes; Ensure the two drilling holes are on the same level. Drill the holes, then insert the plastic plugs into the holes; Fix the wooden bracket of the mirror to the wall with the screws and then connect the electric wiring.
2. Place the mirror on the crossbeam of the wooden bracket; Adjust and position the mirror in the middle of the wooden bracket.

- .If fitting mirror to a stud wall, please replace plastic plugs with an appropriate hollow wall fixing.
- .This product must be fitted in compliance with current version of BS7671.
- . IPX4.
