

The keys to success

Easy to use : it opens and closes simply by pressing the plug with your foot or your hand.

Easy to install : no cable, no pull chain, no plastic plug!

Easy to maintain : all the wear and tear parts remain accessible.

Easy to clean.

The new generation

A revamped plug !

- A larger plug that covers more of the waste : the diameter goes from 61 to 65 mm.
- A new domed plug, with a more contemporary design.
- The slider is replaced by a "PUSH-WIRQUIN" laser marking.

The product is more resistant !

- The new Quick Ciac resists to over 50 000 openings/closings. The equivalent to 35 years of use for a family of four.

A quicker flow !

	Quick Ciac New generation	Test conditions (height of water)
Washbasin (with trap)	0,75 L/s	In 120 mm
Bath (with trap)	0,80 L/s	In 300 mm

A plug that is easier to open and close !

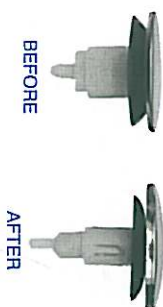

- The effort needed drops from 47 newtons to 33 at opening and 40 at closing.

A faster and easier installation !

- The plug clips into the waste; it no longer needs to be screwed in, hence it is time saving.

Reduced maintenance !

- The new plug fits into the existing waste which enables replacement of products already installed.
- The same plug is used for either washbasin or bath wastes.
- Without tools and without dismantling of other parts, the plug can be replaced in less than 10 seconds and the plug washer in less than 20 seconds.

The new packaging :

New plug

Better looking, more resistant, more effective!

New overflow over
Wider, more domed-shaped,
better looking !
(Available in chromed, white or golden ABS)
