Jet / Spray aerator

About this product:

Once installed this jet / spray aerator will replace your existing aerator. The jet / spray aerator will swivel to allow accurate delivery of water, by turning the end section, the aerator will switch between a jet & spray water pattern. Using the spray function will reduce your water wastage and ease many every day functions.

For more information on reducing water and energy wastage visit our website.

Installation Instructions:

Preparation:

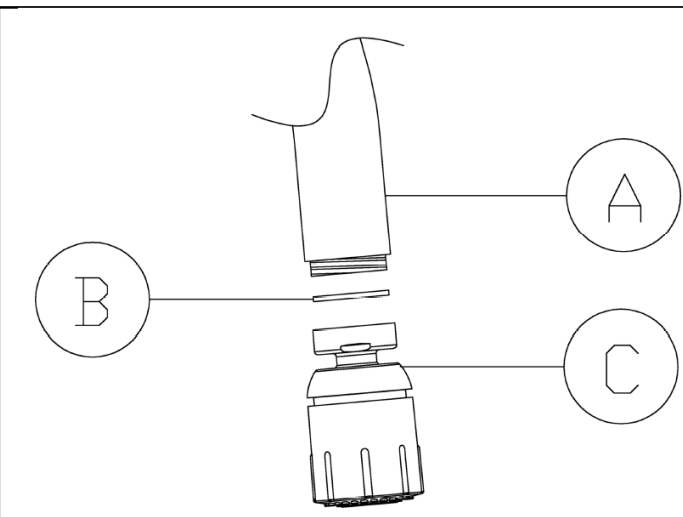

All parts should be removed from their packaging and inspected for any transport damage prior to installation.

Shut off your hot and cold water supply as required before commencing installation to prevent accidental splashing during installation.

Installation:

1. Unscrew the old aerator from the end of your spout; note a pair of rubber gloves will help you get a positive grip around the aerator if it is stiff.
2. Take the rubber seal (B) from your existing aerator if required and place it in the jet / spray aerator (C).
3. Firmly screw the new jet / spray aerator (C) onto your spout (A).

Parts and Contents:

Key	Description	Qty	
A	Tap spout	-	
B	Rubber seal (Reused from original spout if required)	-	
C	Revolve aerator	1	

After installation:

Once you have visually checked the new fittings and connections, ensure that the tap is turned on. Turn on the water supply at the mains stop cock. As the system starts to refill, check carefully for leaks around the aerator. Once you are fully satisfied that there are no leaks, turn on the water heating if applicable.

Important Technical Data:

Min/ Max operating pressure dependant upon tap / 5.5 bar*, Maximum hot water temperature 70°C*

*Note: If these temperatures or pressures are exceeded, even for short periods, damage can result. In these instances a thermostatic mixing or pressure reducing valve should be installed.

All Abode products are either WRAS approved or manufactured in accordance with recognised European standards. Please ensure that this product is fitted in accordance with Local Water Byelaws.

These installation guidelines have been prepared for your direction and you must exercise due care at all times. We do not accept responsibility for problems that may occur through improper installation.
