Vertical Exhaust Duct

Vertical Exhaust Duct

Vertical Exhaust Duct attaches to the top of the cabinet to provide a sealed pathway for hot air from the top of the cabinet to an overhead drop ceiling as part of a closed hot air return.

- Used with Solid Rear Door, Bottom Panel, Air Dam, Snap-In Filler Panels and Air Director to completely contain hot exhaust air and remove it from the cabinet and room
- Fits cabinets that are 41.3" D (1050 mm) or deeper that have a 2-piece Server top panel
- 2-piece duct adjusts in height to span the distance between the top of the cabinet and the overhead drop ceiling, available in three sizes (see description in order table)
- Features easy height adjustment, has a flexible seal at the top to accommodate variations in the drop ceiling
- Includes a brush-sealed opening on the back for power cords
- U.S. patents apply to this product.
