Finishes

Impressive down to the last detail.

[illegible]

That's why we've created a range of finishes for every environment, including graphite, brushed brass, brushed nickel, brushed stainless, and polished brass, in addition to our standard polished chrome. Let Sloan put the finishing touch on your commercial restroom design.

Sloan's proprietary Physical Vapor Deposition (PVD) finish process enhances our products' resistance to chemicals and abrasion by bonding the finish at the molecular level. This innovative technology is an essential solution for curved and angled products that are difficult to coat. When compared to powder coating or immersion processes that are typically used, the durability of PVD ensures a long-lasting finish that will stand up to commercial use.

NEW

Brushed Brass

Discover the brilliance of brushed brass

Introducing our newest finish option, brushed brass, designed to elevate any commercial environment with a subtle yet captivating radiance. This remarkable finish brings warmth, charm, and sophistication to any atmosphere. Showcase your impeccable taste and design eye by choosing brushed brass.

Graphite

Lead by design with graphite

Set the tone for modern sophistication. The graphite finish can create a unique, high-contrast palette that's sure to leave an impression.

Sloan is the only commercial manufacturer offering a graphite PVD finish.

Brushed Nickel

Enhance your environment with brushed nickel

Brushed nickel finish brings an element of comfort to any commercial restroom and accommodates a variety of design aesthetics. Since it doesn't show most fingerprints or water marks, brushed nickel is perfect for any high-traffic environment.
