Features

Multi-patented cartridge technology for safe, long-lasting, low-odor performance while saving tens of thousands of gallons of water every year

- Keeps pipes and housing cleaner—flexible pour spout combines with a modified cartridge outlet to concentrate and redirect the exiting urine
- Reduces odor—the cartridge features a reduced surface area that eliminates space for bacteria growth
- Retains sealant better—diverter combines with the internal baffle to help retain sealant, even if a bucket of water is accidentally dumped into the urinal
- Estimated lifespan of approximately 7,000 uses before needing replacement, providing extended usage and reducing the frequency of cartridge changes
- WES-150 package includes the urinal cartridge itself, a removal wrench key for easy cartridge replacement, a disposal bag for hygienic cartridge disposal, and blue sealant to maintain optimal functionality
- WES-150 package includes the urinal cartridge itself, a removal wrench key for easy cartridge replacement, a disposal bag for hygienic cartridge disposal, and blue sealant to maintain optimal functionality
