

## Masonry Drill Bits

### Masonry Drill Bits

A premium quality masonry bit for use in cordless and corded drill drivers in both rotary and hammer action.

Ideal for drilling brick, block and concrete.

- 135° High Grade Industrial Carbide Tip
- Ground flute
- Silver/black finish
- Heat treated

### TCT Multi-Purpose Drill Bits

Designed to drill steel, wood, masonry, PVCu, ceramics and concrete.

Diamond-ground cutting edges allow fast drilling even in hard materials.

**ROTARY MODE ONLY.**

- High quality European diamond ground carbide tip with 135° angle point
- High temperature copper brazed
- Ground flute
- Silver and gold finish
- Heat treated

## Ceramic, Tile & Glass Drill Bits

### Dry Diamond Drill Bits

Ideal for drilling a clean hole into hard materials such as porcelain, ceramic, marble, granite and glass.

**ROTARY MODE ONLY.**

- Up to 10x more holes
- Over 40% faster
- Vacuum brazed diamond technology
- Suitable for dry or wet use
- Wax insert aids cooling and prolongs life
- Non-slip hex shank

### How to use Dry Diamond Drill Bits

1. Ensure the drill bit is fastened securely in the chuck. Hold the drill firmly in both hands and start to drill at a 45° angle to the work surface. This will produce a small crescent shaped groove.

2. When the groove is formed, slowly bring the drill up to 90° to the work surface. The tool should carry on drilling through the material without slipping.

### TCT Tile & Glass Bits

For accurate drilling of glass and ceramics.

A lubricant such as water is recommended when drilling glass.

**Use the bit in ROTARY MODE ONLY at a low R.P.M.**

- Cross ground, spear shaped Tungsten Carbide tip
- Shot blast finish
